

From Mining Title Administration

"In response to your request for a summation of the service offered by AMETS, I welcome the opportunity to voice my opinion of the professional service offered by your organisation.

As a participant in the Mineral and Petroleum Exploration and Production Industry of some 27 years, and with the advantage of having been previously involved professionally with both you and your senior Staff, I had no hesitation in contacting you when an urgent situation arose that I needed assistance with on behalf of a Client.

Your organisation is to be commended in providing a prompt, professional, service with discretion and knowledge of all that is required within the Industry.

With the background knowledge of the various Acts pertaining to the Industry, and your rapport with the governing departments and their policies which are applicable in addition to the legislation, I would commend your Service to other reputable members of the Industry."
